<p><i>Data mature organizations vastly outperform their competitors on all business KPI. Today data is in abundance. However, building data driven culture requires giving access to data to users and enabling self-service, in timely fashion. Organizations need the ability to ingest all kind of structured , unstructured data, process that at scale and build insights using this data. The speed at which data needs to be converted to insights is critical to right decision making. The promise of big data, advanced analytics and the insights they can deliver are compelling. In this talk we will discuss how various technologies like SQL Data Warehouse, Azure Data Bricks, Azure Data Factory and Machine Learning are augmenting traditional business intelligence to drive transformation across industries.</i></p>	
12:45 PM	GROUP PHOTOGRAPH
1:00 PM	NETWORKING LUNCH
