DataPlatformGeeks (DPG) & SQLServerGeeks (SSG) are community initiatives by Amit Bansal

# Summary

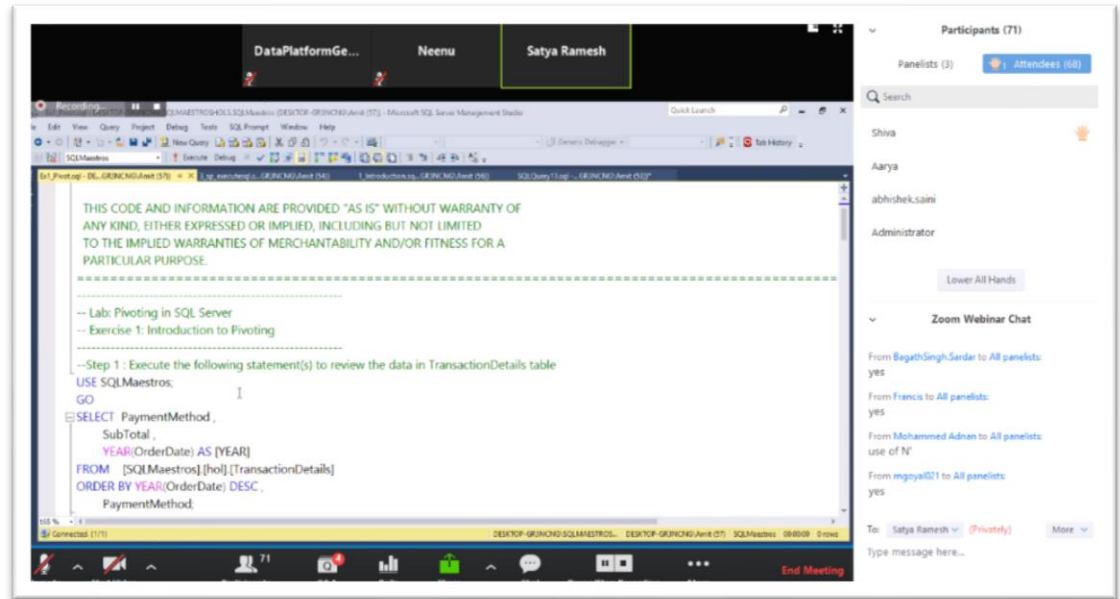

- DPG Webinar – Understanding Dynamic SQL – The Right Way  
31 January, 2019
- DPG Webinar – Bridging the gap between SSRS and Power BI  
29 January, 2019
- DPG Webinar – Intelligent Query Processing in SQL Server 2019  
10 January, 2019
- DPG Webinar – Azure Machine Learning SDK  
08 January, 2019

# DPG Webinar – 31 January, 2019

Topic: Understanding Dynamic SQL – The Right Way

Speaker: Satya Ramesh  
(Technical Consultant,  
SQLMaestros)

# DPG Webinar – 29 January, 2019

Topic: Bridging the gap between SSRS and Power BI

Speaker: Manohar Punna (MVP, Australia)

### Power BI Report Server

#### Mobile reports

- Power BI Report Server allows to create and view mobile view of power bi reports.
- Mobile reports can also be created using SSRS which is also available in Power BI Report Server.

The screenshot displays the Power BI Report Server mobile interface. At the top, there's a navigation bar with 'Home' and 'Reports'. Below this, a dashboard is visible with several widgets. A red box highlights a specific report widget, likely demonstrating the mobile view. The dashboard includes various charts and data points, such as 'North America' with a value of 27, and '7,428' and '\$1.27M'. The bottom of the screen shows a Windows-style taskbar with icons for navigation and a 'Leave Meeting' button.

# DPG Webinar – 10 January, 2019

**Topic:** Intelligent Query Processing  
in SQL Server 2019

**Speaker:** Joe Sack (Principal  
Program Manager, Microsoft  
Redmond, USA)

The screenshot shows a Zoom webinar interface. The main content area displays a slide with the following text:

**MGF grant feedback caching**  
Feedback can be stored in the cached plan for a single execution

It is the consecutive executions of that statement, however, that benefit from the memory grant feedback adjustments

Memory grant feedback will change only the cached plan

Changes are currently not captured in the Query Store. Feedback is not persisted if the plan is evicted from cache. Feedback will also be lost if there is a failover.

The right-hand side of the interface shows a 'Participants (87)' list with 'Attendees (84)' and 'Panelists (3)'. Below the list is a 'Zoom Webinar Chat' section with several messages from attendees and panelists.
