

Dear *|FNAME|*,

eDominer Data Community (DataPlatformGeeks) brings you loads of free learning resources, events and webinars. Also, Asia's Largest Data & Analytics Learning Event, DPS 2017, has 11 parallel, full-day, classroom trainings to choose from.

Upcoming Free In-Person Events

- **Data Platform Day - Bangalore - Half Day Event** (3-hours, deep-dive into In-Memory Technologies). **8 July** @ Microsoft, Domlur
- **Data Platform Day - Bangalore - Half Day Event** (IoT, Azure SQL Datawarehouse and PowerBI). **15 July** @ Microsoft, Domlur

Upcoming Free Webinars

- **Webinar - Online - One hour** (Introduction to SQL on Linux). **19 July** (3 PM to 4PM)
- **Webinar - Online - One hour** (Introduction to PowerBI). **21 July** (3 PM to 4PM)
- **Webinar - Online - One hour** (Introduction to IoT). **26 July** (3 PM to 4PM)
- **Webinar - Online - One hour** (Introduction to Azure SQL Datawarehouse). **28 July** (3 PM to 4PM)

Free Learning Resources

- **Ready Reference: SQL Server Wait Stats Version 1**

Full-Day, Deep-Dive Classroom Training on Azure IoT @ DPS 2017 Pre-Cons (Aug 16) – [Click Here](#)

Scott Klein, Senior Technical Evangelist, Microsoft (Redmond, USA) will deliver a demo-based training on “The Azure IoT Ecosystem Workshop” covering:

- Azure IoT Hub
- Stream Analytics
- Power BI
- Azure Data Lake Store
- U-SQL
- Machine Learning
- Azure SQL Database / DW

Demo's included for this workshop are:

- Generating data different devices (Tessel, Raspberry Pi)
- Gathering and storing incoming data
- Gaining insights into streaming data real-time
- Finding trends within data

- Getting valuable insights from IoT data
- A look at predictive analytics

DPS 2017 also brings you Pre-Con workshops on Azure Infrastructure, Advanced Analytics with R, Microsoft SQL Server, Power BI, and Azure Machine Learning, T-SQL Query Tuning, Database DevOps Process, SQL Server Internals, Azure SQL DW, In-Memory technologies in SQL Server, SQL Server on Linux & Data Modeling and Data Visualization.

Pre-con details, pricing & registration information is here: [Click Here](#)

Latest Updates from Redgate

SQL Prompt 8: The latest version of SQL Prompt introduces a new feature that reformats SQL code to a preferred style in literally one click. It means developers can write code in their own style and then switch it to their company-wide style to share it, making true collaboration and standardization possible instantly.
